

## To The Mason Trust

Thank you for selecting me for a grant towards my banger racing safety equipment.

The grant I was awarded was spent on:

- Hans device
- Hans Device helmet posts
- Hans device 16" tether

Being lucky enough to receive this grant has helped me better myself as a racing driver due to now feeling very safe when in the car. The Hans device has not once let me down since purchasing this, which means not once have I suffered whiplash or an injury since due to the Hans device restricting movement.

I also now believe in my self when on the track as I am not anxious about being hurt which has resulted in me picking up many 1<sup>st</sup> places and top 3 finishes. One of these top 3 finishes was 3<sup>rd</sup> in the East Anglian Championship.

The season has now come to an end and will resume in January which I hope to be making a step up into the Rookie Bangers which are much faster and involves a lot of crashing so the Hans device will definitely be a main part of being able to make this step up so I can only thank all of you at The Mason Trust.

I just want to say another big Thankyou to The Mason Trust for making my racing career so much more enjoyable. I appreciate this so much. Thank you to everyone involved! I have attached some pictures on the page below.

Many Thanks Harry Block
