

MENTORING CASE STUDY

Noah felt more pressure deciding on what to do after A-Levels than the exams themselves! Fast-forward two years and he's completed an apprenticeship with distinction.

How it started...

- Didn't know where to apply talents
- Unsure about non-uni routes to careers
- Needed to build confidence
- Wanted guidance on job searching

Focus on university

"I was under a lot of pressure doing A-Levels, but I was more worried about the next steps.

There wasn't much help unless you wanted to go to university, which I didn't!"

Working with a mentor

"I didn't know where to start looking for jobs, especially when I didn't know what I wanted to do.

Shea was amazing, not only did it help build my confidence with online meetings and communications, but she helped take the stress out of researching."

How it's going...

"I was thrilled when I landed an apprenticeship in data analytics. I couldn't have found a job I enjoy more, and I thank The Mason Trust mentoring programme for that.

Nearly two years on, I've finished the apprenticeship with a distinction and was offered a position as a Data Analyst!" - Noah
